DETAILED ACTION

Election/Restrictions

1. Applicant's election of Invention of Group I, Claims 1-12 and 21-25, in the reply filed on 09/27/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election without traverse of Invention of Group I, Claims 1-12 and 21-25 in the reply filed on 09/27/04 is acknowledged. However, Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a semiconductor device, classified in class 257, subclass 295.
- II. Claims 21-25, drawn to a system, classified in class 365, subclass 145.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed is used for the memory circuit while the subcombination as claimed is used for other system. The subcombination has separate utility such as forming the RC filter network.

Art Unit: 2811

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
